Who am I?

- **Designer**
- **Came across conscienciology in 2012**
- **Mother**
- **I should have known all this before.**

The problem

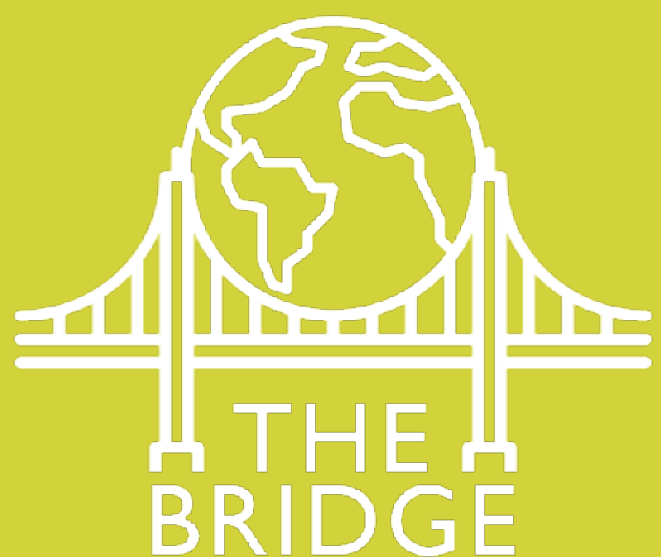

How to present the Conscientiology Paradigm for kids?

- **Children's books**
- **“Boa Noite Universo” and others**
- **They didn't explain or introduced the consciential paradigm as I thought was needed.**

Make a question:

“How to talk about the consciential paradigm for children?”

How did the idea come about?

- **Alone with kids**
- **The ideia**
- **Helper**

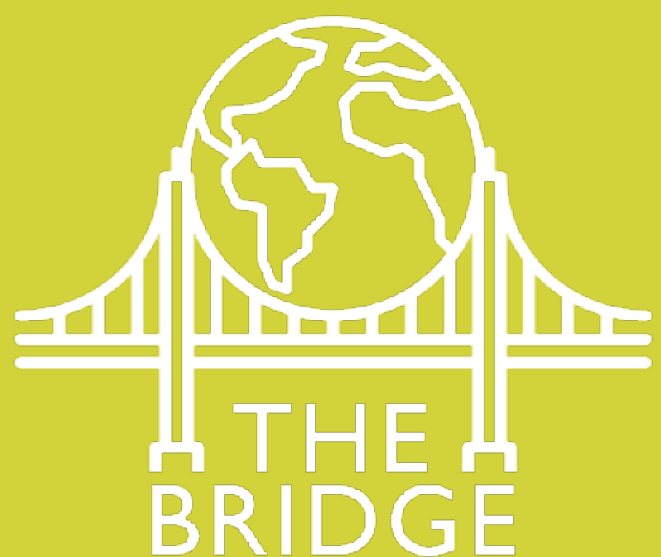

At that right moment I already had:

The title. The Little Researcher

The characters. Luisa and Gabriel, two friends who together would seek answers to their more complex questions, alongside with their intraphysical helper – the very special Joana.

Theme. Understanding multidimensionality

Step by step
