Megastrongtrait: research and writing

Dayane Rossa

My objectives

1. Personal chronology until writing the book
2. Methodology of consultancy specialized in megastrongtrait
3. Methodological changes over time
4. Questions / research / writing
5. Challenges of megastrongtraitology specialty research

Definition

The megastrengthtrait is the major strength-trait or predominant megatalent in the structure of the microuniverse of a consciousness...

capable of sustaining its maximum evolutionary recycling and recin,

...keep the materthosene working at a high level of dynamism and constructiveness.

PERSONAL CHRONOLOGY

2000 – Term megastrongtrait : “Surely I don’t have one megatrait”

2005 – “Even if I had a megatalent, it would be very difficult to discover it”

PERSONAL CHRONOLOGY

2011 – Idle strongtrait

“The strongtrait, or positive component of the microuniverse of a consciousness kept inactive, sterile, underused, unprofitable, weakened, abandoned, latent in the personal manifestation and neglected”

2014 – Book Manual of the Guinea-pig Intraphysical Consciousness

PERSONAL CHRONOLOGY

2015 – First hypothesis : **resolutivity** / Second hypothesis: **leadership**

2017 – Consultancy specialized in megastrongtrait

2018 – Megastrongtrait course

PERSONAL CHRONOLOGY

2020 – Book Megastrongtrait: a study of one´s major consciential talent under the perspective of multiexistentiality

My research started with questions

- ✓ *How can someone do something so naturally?*
- ✓ Why do some children show above-average skills in certain tasks?
- ✓ Why is it so difficult to see the megastrength trait in our manifestation?

Crescendum

Some examples

<i>Megaweaktrait</i>	<i>Miniweaktrait</i>	<i>Ministrongtrait</i>	<i>Megastrongtrait</i>
Closedness	Rigidity	Flexibility	Openness
Rage	Aggressiveness	Respect	Affection
Skepticism	Mysticism	Intuition	Parapsychism

What happened in past lives to change these traits?

Skepticism

- fought against religious people
- fought against parapsychic people
- closed to new ideas
- did not consider the energies
- did not consider past lives

Intuition

- uses insights more often
- combines rationality and intuition
- sometimes more rational
- considers parapsychism

Mysticism

- butterfly seeker
- dedicated to mystical practices
- became religious
- More emotion with energies

Parapsychism

- has several types of paraphenomena
- works with parapsychism
- Is open to advanced ideas
- Considers and uses the energies
- considers past lives

**How do we work in the
consultancy specialized in
megastrongtrait?**

LISTING OF 200 STRONGTRAITS

Under strongtraitology analysis, we present a list of 200 strongtraits, which can be self-diagnosed (Manual of the Guinea-pig Conscin; 2014).

From the analysis of these questions, mark in the table below the percentage of use of each strongtrait.

What percentage of these strongtraits is present in your daily routine?				Overall average #DIV/0!			
Variable	%	Variable	%	Variable	%	Variable	%
01. Openness		51. Cooperativity		101. Focus		151. Perseverance	
02. Selflessness		52. Courage		102. Fortress		152. Persistence	
03. Calm down		53. Cordiality		103. Frankness		153. Relevance	
04. Reception		54. Cosmoethics		104. Generosity		154. Research	
05. Acuity		55. Cosmopolitanism		105. Gratitude		155. Pioneering spirit	
06. Adaptability		56. Credibility		106. Harmony		156. Politeness	
07. Affability		57. Creativity		107. Sustainability		157. Polyglotism	
08. Affection		58. Judgment		108. Heuristics		158. Reflection	
09. Cheer		59. Criticality		109. Histrionics		159. Punctuality	
10. Agglutination		60. Curiosity		110. Interactivity		160. Positioning	
11. Pleasantness		61. Decision		111. Homeostasis		161. Planning	
12. Joy		62. Dedication		112. Honesty		162. Pragmatism	
13. Altruism		63. Defensibility		113. Intellectuality		163. Accuracy	
14. Friendship		64. Detachment		114. Impartiality		164. Presence	
15. Lovingness		65. Desnudation		115. Imperturbability		165. Helpfulness	
16. Analyticity		66. Detailing		116. Unshakable		166. Proactivity	

TECHNIQUE

Pick the 20
predominant strengths

How she or he
sees
herself/himself

Determination	Adaptability
Dynamism	Self confidence
Exemplarism	Rationality
Focus	Proactivity
Charisma	Tenacity
Leadership	Self-effort
Objectivity	Discipline
Industriousness	Detailing
Courage	Discernment
Decidophilia	Eloquence

Determination

Discipline

Self-confidence

Courage

Objectivity

TECHNIQUE

How she or he
sees
herself/himself
+
How is perceived
by others

ATTRIBUTES	STRONG TRAIT
Self-deintrudability	Self-confidence
	Balance
	Constancy
Self-discernment	Reflection
	Prudence
	Assertiveness
Communicability	Clarity
	Eloquence
	Persuasive

ATTRIBUTE EXAMPLES

Conscientiogram

Leadership
Communicability
Prioritization
Coherence
Conscientiality
Universality

Verbet: Consciential attribute

- Intellection
- Self-thosenity
- Imagination
- Mental self-concentration
- Critical self-judgment
- Association of ideas
- Paraimagination
- Parapsychism
- Memory
- Self-discernment

20 MEGA ATTRIBUTES PROPELLERS OF EVOLUTION

- Openness
- Multidimensional self-awareness
- Self-deintrudability
- Self-discernment
- Self-research
- Self-organization
- Cosmoethics
- Cosmovation
- Energetic control
- Personal Evolutionary File (PEF)
- Holomaturity
- Practical Evolutionary Intelligence
- Intentionality
- Interassistentiality
- Neophilia
- Polykarmality
- Principle of Disbelief
- Prioritization
- Self thosenic straightforwardness
- Will

Why include attributes?

According to Dr. Vieira (2018): The desoma is the substitution of small death for immense life, the exchange of 20 consciential attributes for 200 paraconscential attributes. The exact number of these attributes depends on the level of lucidity of the pre-
serenissimus.

- ✓ **Strongtrait:** just a positive trait
- ✓ **Megastrongtrait:** a positive more developed trait
- ✓ **Attribute:** a major characteristic - involves strongtraits, ministrongtraits and functions

Attribute and sub-characteristics

Intellection (mentalsomatology)

the intelligence itself;
the mental faculty of thinking;
rationality;
cognition;
the understanding;
the conceptualization of things;
intellectual capacity;
the right exercise of reason.

Strongtraits

Rationality
Detailing
Analytics
Erudition
Bibliophilia

	Personality in past life	Personality today
WILL	Will	Courage
	Dedication	Determination
	Determination	Committment
	Disposition	Hardworking
	Motivation	Exhaustive
	Obstinacy	Impetuousness
	Perseverance	Obstinacy
	Persistence	Industriousness
	Resolutivity	Persistence
	Tenacity	Productivity
		Resilience
	Tenacity	

How do we work today?

- ✓ Major megastrongtrait
- ✓ Main attributes
- ✓ Parapsychic megastrongtrait
- ✓ Communication megastrongtrait
- ✓ Intellectual megastrongtrait

Challenges of Megastrongtraitology

1. When to use one word or more for the megatalent?
 - ✓ Words can limit the content of the megastrongtrait.
 - ✓ Varied meanings of the word for different people.

Challenges of Megastrongtraitology

2. Is a megastrongtrait idle or not?

- ✓ We have some limitations to understand the reality of the consciousness

Relevance of the theme

“The megastrongtrait is the unit of measure for Holomaturity”

Full maturity: evolutionary, cosmic, biological, psychological, multidimensional and holosomatic

Relevance of the theme

How a megastrongtrait can help us to increase our holomaturity?

THANK YOU
